DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being unpatentable over Risberg et al. (U.S. 5,339,392).

Risberg et al. teach a system and method for processing electronic transactions, comprising:

- receiving input by a server terminal from a client device over a first communication port to initiate an electronic transaction (90);
- establishing a second communication port for directly coupling said server terminal to said client device (162);
- transferring information regarding said electronic transaction from said server terminal to said client device over said second communication port (abstract);
- detecting receipt of said transaction information by said client device (figs. 39A-43); and
- providing an audio effect by said transaction information by said client upon detection of receipt of said transaction information (col.28, lines 4-25).
